

LT9 MOBILE LAUNDRY DESCRIPTION:

LT9 is a fully functional mobile laundry, housed in a 53' trailer. The mobile laundry units have been designed with two internal electric water heaters, 12 washers and 12 driers. The mobile laundry trailer also houses table space for sorting and folding along with racking space for storage.

CAPACITY:

LT9 is fully capable of supporting over 250 people per day.

POWER REQUIREMENTS:

Mobile Laundry requires an electrical source. A 220v 100kW generator is needed to supply power to the laundry trailer. Generator must be hard wired in to the unit's two 200amp breaker panels.

POTABLE WATER REQUIREMENTS:

Mobile Laundry requires potable water source. A single ¾" potable garden hose connection is needed. In the event of no on site water location, the laundry can be supplied from a mobile tanker trailer.

GRAY WATER REQUIREMENTS:

Mobile Laundry also requires grey water drop site. Connection is made with a 2" male camlock fitting. If no city sewer drop exists, the unit is supplied with self contained 1350 Gal. holding tanks. A grey water removal service is required to drain tanks over the course of the operation.
