

S335 MOBILE SHOWER DESCRIPTION:

S335 is a fully functional mobile shower housed in a 48' trailer. Unit has a total of 11 shower heads, and a pull out sink, which houses 8 basins. A partition wall divides the unit into two sections of 5 and 6 shower heads. Sections can be interchanged for male and/or female use. Florescent and natural lighting is provided, inside and out. Exhaust hood fans are used to aerate the shower.

CAPACITY:

S335 is fully capable of supporting over 500 people per day.

POWER REQUIREMENTS:

Mobile shower requires an electrical source. Each unit is supported by an on board 7000w generator. If a shore power supply is available, shower can be powered by two 110v connections with on board adapter.

PROPANE REQUIREMENTS:

Mobile shower has two on board 74 gallon propane tanks.

POTABLE WATER REQUIREMENTS:

Mobile shower requires a potable water source. If a potable city water connection is available, shower can run off standard 1 ½" fire hydrant, or ¾" potable garden hose. In the event of no on site potable water location, shower can be supplied from a mobile tanker trailer.

GRAY WATER REQUIREMENTS:

Mobile Shower also requires gray water drop site. Connection is made with a 2" male cam lock fitting. If no city sewer drop exists, the unit is supplied with self contained 1350 Gal. holding tanks. A gray water removal service is required to drain tanks over the course of the operation.
